Subject: Associated with a fresh active Western Disturbance, scattered to fairly widespread rainfall activity likely over Northwest India & snowfall over western Himalayan region during 27th-28th December 2024.

An **intense Western Disturbance** is very likely to affect Northwest India from the night of 26th December onwards. Under its influence, an induced cyclonic circulation very likely to form in the lower tropospheric levels over southwest Rajasthan & neighbourhood on 27th December, 2024. These systems are likely to interact with lower levels easterlies leading to high moisture feeding from Arabian Sea as well as Bay of Bengal till 28th December. Under the influence of these systems:

- ✓ Fairly Widespread to Widespread Rainfall/Snowfall is likely over Western Himalayan Region during 26th-28th December with peak activity on 27th and 28th December.
- ✓ Scattered to fairly widespread rainfall also likely over plains of northwest India and adjoining central India on 27th and 28th December.
- ✓ Thunderstorm accompanied with hailstorms also likely over Punjab, Haryana, West Uttar Pradesh, Rajasthan and Madhya Pradesh on 27th-28th December.
